## PROJECTS

---

### Skill Bridge

(Dec 2025 - Jun 2026)

- **Engineered** a responsive full-stack platform using **React.js** and **Node.js**, improving page load speeds by **40%** through component optimization.
- **Translated** high-fidelity **Figma** designs into pixel-perfect code, achieving **100%** UI consistency across mobile and desktop devices.
- **Secured** user data by implementing **JWT** authentication, successfully handling session management for over **50+** test users.
- **Optimized** backend REST APIs to reduce latency by **30%**, ensuring real-time content delivery for course modules.

### VIBE 4 U

(Aug 2025 – Nov 2025)

- Developed a full-stack movie booking platform using **React.js**, **Node.js**, and **Express.js**, enabling users to browse movies and book tickets seamlessly.
- Implemented **user authentication and real-time booking management** using **Firebase / MongoDB**, ensuring secure data handling and instant updates.
- Designed an **interactive seat selection system** with dynamic availability tracking using **JavaScript and REST APIs**.
- Built a **responsive and optimized UI** using **HTML, CSS, and Material UI / Bootstrap**, improving user experience across devices.

### Student Portal

- Engineered a dynamic student portal using Servlets, JSP (NetBeans), and MySQL.
- Automated attendance, assignments, and announcements, reducing faculty workload.
- Enabled secure login and real-time data updates for faculty and students.
- Improved efficiency of academic data handling through optimized database queries.
